

Frontend Developer Test

Rundown:

Attached is a design that you will have to recreate using HTML/CSS/Bootstrap/Javascript/JQuery.

All the resources will be provided with the exception of images.

We do want the slider to function to demonstrate Javascript use.

Use a timer to see how long it takes you to complete this test, please let us know how long it took when you send the result.

The text content doesn't really matter, you can add some filler text (lorem ipsum) or you can write up what is in the design.

Browser compatibility should be for IE11, Edge, Chrome, Safari, modern browsers.

For extension you may want to consider mobile responsiveness.

Resources:

These are some of the resources we use in everyday development. If there are any alternatives you use feel free. These are just some resources to help with the test.

Font-family: Open Sans

<https://fonts.google.com/specimen/Open+Sans?selection.family=Open+Sans>

Banner slider

<http://kenwheeler.github.io/slick/>

Colours:

Feel free to use the eyedropper tool inside of your image editor to pick the colours from the design. Here is a list of the brand colours.

Red: #eb2737

Blue: #214b83

White: #ffffff

Grey: #e8e8e8
